RANVEER KUMAR

Frontend/UI Engineering Director | Practice
Head

PROFILE

As a results-driven UI Development Director with over 22 years of dedicated experience, I bring a profound passion for user-centric design, innovative leadership, and a track record of delivering exceptional digital experiences. My journey in the ever-evolving world of UI development has been marked by continuous growth, collaboration with global teams, and a relentless commitment to excellence.

Extensive experience in leadership acumen, and passion for UI development to drive transformative user experiences for organizations.

Continuous experience at business development, project oversight, and day-to-day team management.

LEADERSHIP EXCELLENCE:

Throughout my career, I've held key leadership positions, directing dynamic teams of UI professionals to excel in developing stunning and highly functional user interfaces. I have a proven ability to inspire and lead cross-functional teams toward a shared vision of excellence.

MULTI-FACETED EXPERTISE:

My extensive expertise spans a broad spectrum of UI development domains, from responsive web design and accessibility advocacy to cutting-edge UI technologies. I have successfully navigated the challenges of multi-platform

EDUCATION

International Institute of Information Technology, Hyderabad (India)
2020

Advanced Certification in AI/ML (85%)

Makhanlal Chaturvedi Rashtriya Patrakarita University, Bhopal (India)

2000 - 2003

Bachelor of Computer Applications (73%)

WORK EXPERIENCE

TA DIGITAL, OMNICOM GROUP (HYDERABAD, INDIA)

Director, UI Development

April 2024 – Till Date

Responsibilities: Head of UI Practice, Learning & Development India, Engineering Leadership, Practice Resource Utilization & Revenue, Pre-Sales, Budgeting, Gatekeeping, Training & Mentorship, UI Hiring, Research & Innovation, UI Architecture, UI Code Quality & Standards, Reusable Component Library, Web Performance, Grief Counselling, Make Things Happen, Key Performance Indicator (KPI), Collaboration.

TA DIGITAL, OMNICOM GROUP (HYDERABAD, INDIA)

Associate Director, UI Development

January 2022 – March 2024

Responsibilities: Head of UI Practice, Engineering Leadership, Practice Resource Utilization & Revenue, Pre-Sales, Budgeting, Gatekeeping, Training & Mentorship, UI Hiring, Research & Innovation, UI Architecture, UI Code Quality & Standards, Reusable Component Library, Web Performance, Grief Counselling, Make Things Happen, Key Performance Indicator (KPI), Collaboration.

TA DIGITAL (HYDERABAD, INDIA)

Sr. UI Architect

May 2021– December 2021

Responsibilities: Head of UI Practice, Engineering Leadership, Practice Resource Utilization & Revenue, Pre-Sales, Budgeting, Gatekeeping, Training & Mentorship, UI Hiring, Research & Innovation, UI Architecture, Code Design, Design Patterns, Problem Solving, UI Code Quality &

development, ensuring seamless user experiences across web and mobile.

GLOBAL COLLABORATION:

I have had the privilege of collaborating with diverse, global teams, embracing the richness of cross-cultural insights and perspectives. My ability to unite teams across geographical boundaries has been instrumental in delivering international UI solutions.

INNOVATION AND THOUGHT LEADERSHIP

My career has been defined by a commitment to innovation. I have been at the forefront of pioneering new UI development techniques and cutting-edge technologies. My contributions to thought leadership in the field have enabled me to drive forward-looking strategies for UI excellence.

CLIENT SATISFACTION AND RECOGNITION

Client satisfaction has been a cornerstone of my career. I take immense pride in building lasting client relationships, resulting in awards and recognitions for our commitment to quality, performance, and user satisfaction.

MENTORSHIP AND TALENT DEVELOPMENT

Guiding emerging UI talent is a responsibility I hold in high regard. I have nurtured the skills and careers of junior developers & fresh college grads., fostering a culture of continuous learning and growth within my teams.

STRATEGIC VISION

My leadership is grounded in a strategic vision for UI development, where the user experience is paramount. I'm dedicated to pushing boundaries, exploring emerging trends, and consistently delivering UI solutions that exceed expectations.

Standards, Reusable Component Library, Web Performance, Collaboration.

UI Architect

September 2017 – April 2021

Responsibilities: UI Architecture, Code Design, Design Patterns, Problem Solving, UI Code Quality & Standards, Reusable Component Library, Web Performance, Pre-Sales, Training & Mentorship, UI Hiring, Research & Innovation, Leadership, Team Management, Collaboration.

PERSISTENT SYSTEMS LTD. (PUNE, INDIA)

Technical Specialist UI

May 2016–August 2017

Responsibilities: UI Architecture, Code Quality & Standards, UI Training & Mentorship, Hiring, Research & Innovation.

TSSS INFOTECH (HYDERABAD, INDIA)

Manager UI

November 2012–April 2016

Responsibilities: Managing UI Dev. Team, UI Architecture, Code Quality & Standards, UI Training & Mentorship, Reusable, and extendible component library.

TIMES INTERNET (NCR, INDIA)

Manager Technology

May 2012–November 2012

Responsibilities: UI Architect and manager, Code Quality & Standards, UI Training & Mentorship, Hiring, Research & Innovation.

SAPIENT (NCR, INDIA)

Sr. Interactive Developer

January 2011–May 2012

Responsibilities: Develop cross-browser apps., Front-end optimization, Client communication, Mentor team members, Code quality & review.

SERA SOLUTIONS (HYDERABAD)

Sr. UI Engineer

October 2009–January 2011

Responsibilities: Cross-browser pages, Front-end optimization, Client communication, Code quality & review, Mentor team members, Front-end coding standards.

VIRTUSA INDIA (HYDERABAD, INDIA)

Sr. UI Engineer

March 2009–September 2009

Responsibilities: Cross-browser pages, Front-end optimization, Client communication, Code quality & review, Mentor team members, Front-end coding standards.

CHAMPIONING FUNDAMENTAL PRINCIPLES

I've an advocate for:

- Strong basics of Web protocols, technologies (HTML, CSS, JS), accessibility, DSA, best practices & principles, and performance.
- Conceptually Strong
- Thinker
- Doer

IDEs

TSSS INFOTECH (HYDERABAD, INDIA)

Technical Producer

May 2007–February 2009

Responsibilities: Cross-browser pages, Front-end optimization, Client communication, Code quality & review, Mentor team members, Front-end coding standards.

KRRISH HOLIDAYS (HYDERABAD, INDIA)

Web Developer

July 2004–April 2007

Responsibilities: Freelance consultant, Designing UX, Architecture of all 3 layers, Server-side & Front-end Dev.

PROJECTS

Mercedes-Benz **US, CA, UK, VANS**

19 months 19

Scope is to re-design, refactoring and re-implementing an overall architecture of the projects and migrating them to Adobe Cloud.

2022 - 2025

Involved in communication & collaboration with client, intra-agency, and internal stakeholders. Leading the UI team of 18+ developers, including 5 UI leads and 1 Sr. UI Architect.

Tech. Stack: Micro Frontend, Mono Repository, React.js, Redux, Vue.js, GSAP, Adobe AEM, Adobe Target, Adobe Launch, Webpack, Gulp, Babel, SCSS, AXE, Karma, Chart.js, Lodash, Cypress – _headless, Three.js

Bose Performance

19 months 19

Overall, Web Core Vital is looking bad for Bose.com. We re-built the website in React based on atomic structure. Next.js via a Lambda function is performing SSR of components to deal with SEO - which is a crucial requirement for product pages.

2021

Tech Stack: Atomic Design, AEM, Storybook, React, Next, AWS Lambda, HTML, CSS, JS, Typescript, Bootstrap, SCSS, Jest, Webpack

Equinix Websites

19 months 16

Redesign and Redevelopment of Equinix websites for different countries. An AEM 6.5 based development including atomic design approach and Storybook for a large component library at front-end side.

2020 - 2021

Tech Stack: Atomic Design, AEM, Storybook, HTML, CSS, JS, TypeScript, Bootstrap, SCSS, Webpack.

VS Code, Atom, IntelliJ

TEMPLATING

Handlebars, Jade, Pug

Methodologies & Tools

Scrum, JIRA

CSS PREPROCESSORS

LESS, SCSS

OOCSS & STYLE GUIDES

InuitCSS, SMACSS, MVCSS, BEM

VERSION CONTROL

GIT, Subversion

Package Manager

NPM, Yarn, Bower

FRONT END PERFORMANCE

Lighthouse, Perfbudget, Webpagetest, PageSpeed

JS FRAMEWORK

React, Vue, Ember, Backbone, Angular, Polymer, jQuery

JS PREPROCESSORS

TypeScript, Babel

PROCESS AUTOMATION

Grunt, Gulp

CODE QUALITY

JS Hint, ES Lint, TS Lint, SASS Lint, SonarQube

BUILD TOOLS

Webpack, Parcel, Browserify, RequireJS

AUTOMATED UNIT TESTING

Jest, Mocha, Karma, Jasmine, NYC (Istanbul)

SERVER SIDE & BACK END

Node.JS, Sails.js, PHP, MongoDB, MySQL

Glucerna Store

 03 months  06

2020

Subscription based nutrition products from Abbott. Client runs a separate e-commerce website, they wanted to migrate the same way as Abbott Store and Similac Store.

Tech Stack: AEM, Magento, HTML, CSS, JS, Bootstrap, SCSS, jQuery, React, Webpack.

Similac Store

 04 months  06

2020

Another e-Commerce website for Abbott to sell the Similac product range.

Similac Store follows the same approach, technology stack. We helped Abbott migrating the existing website on the same path as AbbottStore.

Tech Stack: AEM, Magento, HTML, CSS, JS, Bootstrap, SCSS, jQuery, React, Webpack

Fitbit AEM Build

 11 months  16

2019

Migrated Fitbit large static site to AEM CMS. Fitbit wanted to migrate their world-wide customer facing website from existing static site to be a more dynamic and authorable website. In addition, they wanted to add more exciting features to expand their online customer base through this website.

Tech Stack: AEM, Magento, HTML, CSS, JS, Bootstrap, SCSS, jQuery, React, Webpack

Fitbit AEM Build

 11 months  16

2019

Migrated Fitbit large static site to AEM CMS. Fitbit wanted to migrate their world-wide customer facing website from existing static site to be a more dynamic and authorable website. In addition, they wanted to add more exciting features to expand their online customer base through this website.

Tech Stack: AEM, HTML, CSS, JS, Bootstrap, SCSS, jQuery, Babel, Mustache, Jasmine, Webpack

Self-Service Portal

 07 months  12

2019

Bose customers had only option to get the support through phone calls or emails. We developed and incorporated a self-service module, where Bose customers could search their product, check warranty, and order a replacement or service on their own via Bose's official website.

Tech Stack: AEM, HTML, CSS, JS, SCSS, jQuery, Jasmine, Gulp

TowPlus Web App.

 03 months  06

2019

A challenging and formula-based Cigarette and filter design software was earlier built using legacy technologies like VB, and Access. To get a new feature or formula updated - Celanese will require another version to release. We built a full-stack Web application to make their life easier.

Tech Stack: Node.js, Sails.js, MongoDB, React, HTML, CSS, JS, SCSS, Jest, Webpack

Commerce Factory

 09 months  08

2019

The project is TA Digital's own product. An e-commerce application suite using open-source technologies. A perfect combination of search engine, commerce platform, and CMS. Cutting edge technologies make it extendible and it can build and run an e-commerce application in no time.

Tech Stack: Node, Sails.js, MongoDB, Vue, HTML, CSS, JS, SCSS, Bootstrap, Jest, Webpack

Email Builder

 09 months  08

2019

Different departments in TA, needed a tool to create and broadcast the emails. We developed an integrated solution to let them select the responsive email template, modify content, and broadcast the mails to the wider audience. Admin panel is feature rich to let them create/extend templates.

Tech Stack: Node, Sails.js, MongoDB, Vue, HTML, CSS, JS, SCSS, Bootstrap, Jest, Webpack

TIPS: Point Calculator

 04 months  06

2019

An initiative from UI practice. The tool helps entire org. to make the appraisal to be measurable and transparent. It is linked to the Monthly Review and Performance Appraisal Systems and tracks employees' activities towards a set goal and auto-calculates the points against each activity.

Tech Stack: Node, Sails.js, MongoDB, HTML, CSS, JS, SCSS, Angular, Typescript, Karma, Jasmine, Webpack

TARS

 04 months  06

2019

Target is to cut down the UI dev. efforts by 30-40%. We built a reusable component library. Developers can use the code for any CSS/JS framework and/or CMS In upcoming month AI will power it to - auto populate components required for a domain, auto estimate the projects etc.

Tech Stack: Node, Sails.js, MongoDB, React, Vue, Angular, TypeScript, Polymer, HTML, CSS, JS, SCSS, Jest, Webpack

My Accounts

 05 months  14

2019

Had to boost up the Bose products sales via their own website. We implemented the user login feature. It was challenging to fit our module and wire it through their complex back-end system with multiple 3rd party tools and vendor in the place, and ultimately integrate it with the shopping cart.

Tech Stack: AEM, HTML, CSS, JS, jQuery, SCSS, Jasmine, Gulp

2019

Estimation Tool

 06 months  04

An integrated platform to perform all pre-sales activities. Pre-sales team can create the project and assign to different practice leads to get the estimation done. Resource loading, review, and approval - everything is part of it. Finally, team can generate the SoW or proposals as an artifact.

Tech Stack: Node, Sails.js, MongoDB, HTML, CSS, JS, SCSS, Jest, Webpack

2019

Expense Tracker

 03 months  04

A revamp of SharePoint based legacy expense reimbursement system. Employees and account department wanted a better looking and fast application instead. We utilized the JS based cutting edge full-stack technologies to build this blazing fast tool with additional features.

Tech Stack: Node, Sails.js, MongoDB, Vue.js, HTML, CSS, JS, SCSS, Jest, Webpack

2018

Monthly Review App

 02 months  03

A sort of work-logbook for employees. To maintain transparency with appraisal process, and to keep track of progress towards each employee's goal we built this tool. A manager can enter the details every month for their direct reports. Also, they can assign them with some action item if required.

Tech Stack: Node, Sails.js, MongoDB, React, HTML, CSS, JS, SCSS, Jest, Webpack

2018

DAM Implementation

 05 months  14

Implemented the Digital Asset Management system for Bose to help them easily maintain and manage their digital assets. We customized AEM DAM features to fit client's need. We also created a major challenging module - InDesign and Photoshop plugins using Web technologies, which lets their designers upload the set of assets via AWS bucket from within these Adobe applications with auto-linking features.

Tech Stack: AEM, HTML, CSS, JS, SCSS, jQuery, Jasmine, Gulp

2017 - 2018

Tesla Service Web App

 08 months  09

Tesla car owners can use this application to schedule/re-schedule/cancel a service appointment with the nearest service center. An automated diagnosis will take place and the report can be generated through this tool. Customers can select the car model, problem areas and nearest center.

Tech Stack: AEM, HTML, CSS, JS, SCSS, jQuery, Jasmine, Gulp

2016 - 2017

RIMS Mobile Web

 15 months  16

Dmitri is a Web application for risk management built in Adobe flex. Client wanted to extend the features of their existing legacy system, which is very complex and sophisticated in the nature, to utilize the mobile devices. We built the mobile web app. on their existing system and infrastructure.

Tech Stack: Oracle, .NET, Node, HTML, CSS, JS, LESS, Bootstrap, Angular.js, TypeScript, Jasmine, Grunt

2015

Component Lib.

The client has multiple websites, admin panels and apps, and they are very common in nature and functionalities. We created a library of common and re-usable components at both Java and UI level. So, different tenants (sites) can use the component and could also extend their features.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Gulp

2015

Universal Cart

The client has multiple offers & coupons sites for different countries. That sums up thousands of merchants. USC allows customers to browse products from multiple merchants in one cart and check out in one fell swoop.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Gulp

2014-2015

Ebates Travel

A dedicated site for travel related deals. This application usage 3rd party (TripAdvisor) API to fetch the destination details, allow users to search, sort, filter and proceed for a deal. Front-end part will hit and consume the API, renders results and related filters, and adds required functionality as a SPA. Implemented using jQuery.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Gulp

2014-2015

Ebates Performance

Revamp of website from performance perspective. JS and CSS optimization and A/B testing to make sure pages load within standard time. Considering number of products, images etc. it was AKAMAI based caching. A gulp-based build process upgrade to make sure of versioning and cache busting.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Grunt

2013-2014

Ebates Admin

Administration portal including a centralized dashboard for Ebates' all different websites/app. A Single Page Application written in jQuery. The required API was developed using Java. The portal allows site administrator to manage products, categories, daily deals, discounts, coupons, user benefits, etc.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Grunt

2012

Ebates Mobile Sites

Mobile web site for Ebates. A mobile site should have optimal code to perform faster considering the processing and other limitations. We put additional efforts and created an optimal codebase for mobile site apart from making regular site responsive.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Grunt

2012

TIMES INTERNET ET Portfolio

ET Portfolio is a Personal Financial Management Tool primarily for Indian retail investors. It is a user-friendly money manager keeping users' investments in one place. They can track their investments in Stocks, Mutual funds, ETF's, Fixed Income Products, Cash in Hand & others.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, Gulp

2012

TIMES INTERNET ET Speed

An open information sharing platform that is powered by the community. Besides offering real-time market information and latest news updates from within ET, ET Speed also offers the views of the most important thinkers and experts in the financial market.

Tech Stack: J2EE, PostgreSQL, XML, XSLT, HTML, CSS, JS, LESS, Bootstrap, jQuery, qUnit, Grunt

2012

TIMES INTERNET ET Mobile

Mobile optimized version of website of India's Leading Business Newspaper: offers Business News, Financial news, Stock/Share Market News, Economy News, Loans & Banking. Used jQuery based Single Page Application to fetch the categorized news from the news repository to show it on mobile web.

Tech Stack: J2EE, PostgreSQL, XML, XSLT, HTML, CSS, JS, LESS, Bootstrap, jQuery, qUnit, Grunt

2012

TIMES INTERNET EconomicTimes.com

We migrated India's Leading Business Newspaper to the latest HTML version and jQuery. Modularized the complete site into components with challenges dealing all these with XSLT. Also, organized the advertisement and set some rules & standards in place to make the website faster.

Tech Stack: J2EE, PostgreSQL, XML, XSLT, HTML, CSS, JS, LESS, Bootstrap, jQuery, qUnit, Grunt

2012

TIMES INTERNET Gaana.com

Gaana.com is the largest Indian commercial music streaming service with over 123 million monthly users. We made entire Indian music catalog available to users worldwide. It was unique web application providing live streaming or radio channels, to manage playlists to the users.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, LESS, Bootstrap, jQuery, qUnit, Grunt

2012

Unilever Recipedia

A collections of cooking techniques & recipes from local restaurants, magazines, newspapers, websites, and personal cooking collected. We made this website to available all the cooking recipes to the users. Also, a CMS based interface for the contributors to add their recipes into the system.

Tech Stack: HTML, CSS, JS, LESS, Bootstrap, jQuery

TONI&GUY hairmeetwardrobe.com

2012

My first Single Page Application. Developed this SPA using jQuery to showcase Toni&Guy products, services, accessories to the users. Challenging - as IE8 won't let you manipulate the history queue. Wrote plenty of jQuery plugins to create layers for different tasks & services.

Tech Stack: HTML, CSS, JS, Bootstrap, jQuery

Lux.com

2012

We built a world-wide multi-locale branding website for Lux showcasing all Lux products from Unilever. Tridion would provide interface for content authoring and provides web service to the front-end at the same time. We used JSON data to render the pages on the front-end.

Tech Stack: HTML, CSS, JS, Bootstrap, jQuery

FairPoint CMS Site

2011

Initially in phase 1, created static English site. In phase 2, we integrated it with Tridion CMS system. Now FairPoint portal can detect the user's location and present them with the custom content, such as services provided by FairPoint in the area, packages etc.

Tech Stack: HTML, CSS, XML, JS, jQuery

FairPoint Enterprise Portal

2011

Developed an enterprise portal to support FairPoint's admin operations. The port will allow FairPoint employees to manage the data related to phone, mobile, internet packages and combos, as well as the customer records. They can also manage their partners, resellers data as well.

Tech Stack: HTML, CSS, XML, JS, Bootstrap, jQuery

FairPoint Commissioning Portal

2011

FairPoint Commissioning Portal enables FairPoint's business partners and agents to login through its extranet to manage their business with FairPoint. It includes - user management, packages, report generation and others.

Tech Stack: HTML, CSS, XML, JS, Bootstrap, jQuery

DP Tourist Portals

2010

Built following Drupal based portals:

- sfchamber.visitortouristinfo.com
- mpcc.visitortouristinfo.com
- napachamber.visitortouristinfo.com
- oakhurstchamber.visitortouristinfo.com
- www.metrochamber.visitortouristinfo.com
- www.mediterraneanconnect.com
- www.visitortouristinfo.com
- www.dpcorporation.com

Tech Stack: Drupal, MySQL, HTML, CSS, JS, jQuery

 **SpotZot**

2010

The first and only service in the era that systematically collects and organizes thousands of local merchandise, grocery, dining deals every day from the top 600 U.S. App. runs in mobile browser - based on user's location it suggests them deals & discounts in nearby stores.

Tech Stack: Python Django, MySQL, HTML, CSS, JS, jQuery

 **Civio Solution**

2009

Civio provides the platform to orchestrate interactions that target and engage people in meaningful ways. Customers use Civio to engage people in actions online and offline and receive the benefit of increased participation, affinity and contribution levels.

Tech Stack: Google App Engine, Python Django, MySQL, HTML, CSS, JS, MooTools, jQuery, Google Maps API

 **Cisco**

2009

Cisco runs a very large Intranet site for internal purposes in around 86 languages, containing millions of pages in it. Likewise, it also runs its public facing site cisco.com again in more than 80 languages. Intranet portals are built using an ExtJS based components library.

Tech Stack: ExtJS, HTML, CSS, JS, jQuery

 **Ebates.com**

2007 - 2009

Ebates is the pioneer and leader of online Cash Back Shopping. We at TSSS Infotech, we used to own all the software engineering part to develop, maintain, and enhance Ebates.com. From creating promotional pages to overall migration to jQuery and revamp for user experience and performance.

Tech Stack: J2EE, PostgreSQL, HTML, CSS, JS, jQuery

 **Krrish IMS**

2004 - 2007

Built a PHP+MySQL based large Internal Management System running on Web. This custom system handles all the back-office operations including employees, accounts, billing, invoice, reports, and other management operations.

Tech Stack: PHP, MySQL, HTML, CSS, JS

 **krrishholidays admin**

2004 - 2007

An internal tool to manage the Krrish Holidays website's content, packages etc. Was more of a to the point custom made CMS as well as centralized control panel to manage the website.

Tech Stack: PHP, MySQL, HTML, CSS, JS

**Krish Holidays** krishholidays.com

A PHP based public facing website to allow user search and select the holiday package, book hotel etc. Website was built using LAMP stack and has content being published through its admin tool. Site administrator could add the packages or let users customize the packages.

Tech Stack: PHP, MySQL, HTML, CSS, JS
